

EPL Player Shooting Stats 2023/24 season

Exploring 4 key factos affecting the Number of goals scored:

- 1. Shots
- 2. Shots on Target
- 3. Expected Goals
- 4. Non-expected Goals

The Premier Leage, the highest level of the English football league system, is one of the most popular and attracting football leagues in the world

EPL season 2023/24 is going to the end with only 2 games left to determine the champion of the league. However, the distance between the leading 2 teams is only 1 point.

Let's explore which factors influence the attacking ability of a team and use data to predict the champions of this year

Although Manchester City is standing at the 2nd place Total goals and Overal ranking, it contains a balance goal distribution and the "star" factor, making Manchester City the first candidate for the trophy according to many experts
